

Children Left Behind is committed to improving the lives of children in developing countries around the world

The focus of Children Left Behind is improving the lives of children who are left without clean water or nutritional food, medical care, vaccines or preventative medicine, or education and vocational opportunities. We have a multi-dimensional approach encompassing prevention, protection and policy prioritization.

Imagine what the world will look and sound like when children in need are connected to the people and organizations ready to help them—more effectively than ever before.

The strategic work areas are:

- Awareness and Outreach
- Search, Save and Restore
- Knowledge Sharing
- Encouragement of child development activities in local communities
- Education
- Medical Care

The solution is now for a bright promising future for these children! Join us to learn about innovative ways supporting education and health care in communities in India.

Ways you can join in the solution:

- Donate to an educational outreach
- Sponsor a student or volunteer's mission trip to India
- Join us as we share some of the realities in our nation and abroad; provide your email and we will notify you of our upcoming information meetings
- Improve the lives of children with disabilities

**ENSURING CHILDREN IN NEED GROW UP
HEALTHY, EDUCATED AND SAFE**

Our vision is to see the children in a place where they have elevated themselves beyond survival, where they may flourish and have a chance to live with dignity and purpose.

Children Left Behind improves the lives of children through its four core programs – Medical, Education, Housing and Humanitarian Aid

The programs offered by Children Left Behind are coordinated through our mission partners, an innovative network that connects children in need to the people and organizations prepared to help them.

-  Fighting Child Poverty in India
-  Child Guidance Centre
-  Community and Rural Development Society

Through Child Guidance Centre, and other partner organizations, we provide housing and education for orphans. We take children from poverty and provide them with education and vocational training so they can return to work and improve their communities and families. We will also provide equipment, medical care, therapies and education to children (and their families) with physical or intellectual disabilities.

Medical Outreach

Children in developing countries suffer from many diseases that may be prevented with proper medical care and preventive medicine. Our mission is to provide medical care and education to children and their families in developing countries.

- Care and Education
- Outreach and Mission Trips
- Medical Resources

Educational Outreach

We have partnered with local educators, colleges, and universities in Southwest Virginia to serve through our sister children's organizations and through the schools' established educational institutions in India. We visit schools in India and volunteer our skills and expertise in areas where foreign visitors are allowed.

You too, can be a part of the transformation that education provides in a child's life by giving them a fresh start and a confident hope for a better future! Join us in being a part of the solution.

- Send a Child to School
- Donate to an educational outreach
- Sponsor a student or volunteer's mission trip

In the US we often take education and medical care for granted because it is readily available and a normal part of our lives.

We give children a healthy start, the opportunity to learn, and protection from harm. We want to see children in a place where they have elevated themselves beyond survival, where they may flourish and have a chance to live with dignity and purpose.

By transforming children's lives now, we change the course of their future and ours.

There are some resources available – food, expertise and money – to help children, but few of these resources, either emergency or long-term care, are accessible to those most in need.
